#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 20 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 20, line 6, language directed to "above a floor" is not provided for in the specification.

#### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 2. Claims 18,20-22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kaufman(4829252).

Kaufman(4829252) teaches an open magnet arrangement in which a movable bed has a position extending over a lower pole of the magnet allowing adjacent access to the patient and a position outside of the magnet away from the field.

Application/Control Number: 08/427,070

Art Unit: 3737

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsutani(4875485).

Matsutani(4875485) teaches the claimed invention including an open MR system allowing patient access and having upper and lower poles that are movable and a patient bed that is also movable where the patient is placed over the lower pole of the magnet. Matsutani(4875485) does not specifically teach moving the patient wholly outside the upper and lower poles.

Given the variability of movement of the patient bed and the upper and lower poles of the magnet, movement of the patient wholly outside of the range of the upper and lower poles to allow the patient to be placed on the bed before moving the patient into the field of the magnets may be done as a matter of design choice and according to the desired application.

Therefor, it would have been obvious to one of ordinary skill in the art at the time the invention was made to move the patient in the system of Matsutani(4875485) into and wholly outside of the field of the magnets as a matter of design choice.
